## **BOOK SYNOPSIS**

Ideal for the diagnosis and management of patients with binocular vision anomalies, this practical and accessible manual includes all types of binocular vision problems, not just the most common non-strabismic varieties. Clinical conditions are presented in a concise, straightforward, and clinically relevant format - with topics organized by general information, signs, symptoms, differential diagnosis, work-up, treatment, and follow-up. A separate section for diagnostic and treatment procedures contains all the diagnostic procedures that are required for the effective work-up of patients with binocular vision problems. Helpful charts and tables are also provided and contain a variety of information arranged in an easily referenced, highly portable format. The logical format is organized by symptom to help the reader quickly determine the diagnosis and management of a particular binocular vision anomaly. Sections of useful charts and tables help readers quickly locate important clinical information. A special section on diagnostic procedures contains procedures unique to the treatment of binocular vision problems.
